II. ACCOUNTING PERIOD AND CURRENCY USED IN ACCOUNTING.

The Group's accounting year begins on January 1st and ends on December 31st each year.
The currency used in accounting records is the Vietnamese Dong (symbol VND).

III. APPLICABLE ACCOUNTING STANDARDS AND REGULATIONS.

Accounting system applied:

The Corporation applies the Corporate Accounting System issued under Circular No. 99/2025/TT-BTC dated October 27, 2025, of the Ministry of Finance.

Statement on Compliance with Accounting Standards and Accounting Regulations

The Group has applied Vietnamese accounting standards and the guiding documents issued by the State. Financial statements are prepared and presented in accordance with all regulations of each standard, guiding circulars for the implementation of the standards, and the current accounting system in effect.

Accounting method applied

The company uses a computerized accounting system.

IV. ACCOUNTING POLICIES APPLIED

1. Principles for recognizing cash and cash equivalents:

Economic transactions denominated in foreign currency are converted into Vietnamese Dong Namat the actual exchange rate of the transacting bank at the time the transaction occurs. At the end of the year, monetary items denominated in foreign currency are converted using the average interbank exchange rate Namublished by the State Bank of Vietnam on the last day of the accounting period.

Actual exchange rate differences arising during the period and exchange rate differences resulting from the revaluation of monetary item balances at the end of the year are transferred to financial revenue or expenses in the financial year.

Actual exchange rate differences arising during the period and exchange rate differences resulting from the revaluation of monetary item balances at the end of the year for capital construction investment activities are reflected in the Balance Sheet and transferred to financial revenue or expenses upon completion and handover of the project.

2. Principles for recording inventory:

Inventory valuation principle: Inventory is valued at cost. If the net realizable value is lower than the cost, then the valuation must be based on the net realizable value. The cost of inventory includes the

VCP Power and Construction Joint Stock Company

purchase cost, processing costs, and other directly related costs incurred to bring the inventory to its current location and condition.

The original cost of purchased inventory includes the purchase price, non-refundable taxes, transportation, handling, storage costs during the purchasing process, and other costs directly related to the purchase of the inventory.

Inventory devaluation provision: An inventory devaluation provision is established at the end of the year as the difference between the original cost of inventory and its net realizable value. The method for establishing this provision is based on the difference between the provision required this year and any unused provision from the previous year that necessitates an additional provision or reversal this year.

3. Principles for recognizing trade receivables and other receivables:

Recognition principle: Accounts receivable from customers, prepayments to suppliers, and other receivables at the reporting date, if:

- Assets with a recovery or payment period of less than one year are classified as short-term assets.
- Assets with a recovery or payment period exceeding one year are classified as long-term assets.

Provision for doubtful receivables : The provision for doubtful receivables represents the expected loss in value of accounts receivable that are likely to be unpaid by customers at the time of preparing the financial statements.

4. Principles for recognizing and depreciating fixed assets:

4.1 Principles for recording tangible and intangible fixed assets

Fixed assets are recorded at their original cost. During their useful life, fixed assets are recorded at their original cost, accumulated depreciation, and remaining value.

Depreciation method for tangible and intangible fixed assets: Depreciation is calculated using the straight-line method. The depreciation period is estimated in accordance with Circular No. 45/2013/QD-BTC dated April 25, 2013 .

- Houses and buildings	05 - 35 years
- Machinery and equipment	3 - 15 years
- Means of transport	05 - 08 years
- Management equipment and supplies	3 years
- Perennial plants	3 years

5. Principles for recognizing prepaid expenses:

Prepaid expenses include actual expenses incurred but related to the business results of multiple accounting periods. The company's prepaid expenses mainly consist of office rent, tools and equipment, and fixed asset repair costs. These prepaid expenses are allocated over the prepayment period.

6. Principles for recognizing and capitalizing borrowing costs.

Borrowing costs are recognized as production and business expenses in the period in which they are incurred, except for borrowing costs directly related to the investment in construction or production of work-in-progress assets, which are included in the value of those assets (capitalized), including interest on loans and other incidental expenses incurred related to the loan application process.

7. Principles for recognizing trade payables and other payables

Accounts payable to suppliers, other payables, and loans at the reporting date, if:

- Debts with a repayment term of less than one year are classified as short-term debt.

VCP Power and Construction Joint Stock Company

- Debts with a repayment term exceeding one year are classified as long-term debt.

8. Principles and methods of revenue recognition.

Sales revenue is recognized when the following conditions are met simultaneously:

- Most of the risks and benefits associated with ownership of a product or goods have been transferred to the buyer;
- The company no longer holds the right to manage the goods as the owner or the right to control the goods;
- Revenue is determined with relative certainty;
- The company has obtained or will obtain economic benefits from the sales transaction;
- Identify the costs associated with the sales transaction.

Financial operating revenue: Revenue arising from interest and other financial operating revenue is recognized when both of the following two (2) conditions are met:

- There is potential to obtain economic benefits from that transaction;
- Revenue figures are determined with relative certainty.

9. Principles and methods for recognizing financial expenses.

The expenses recorded as financial expenses include:

- Interest expenses on short-term and long-term loans.
- Exchange rate differences are assessed according to Circular 179/2012/TT-BTC dated October 24, 2012, which regulates the recording, assessment, and handling of exchange rate differences in enterprises.

These amounts are recorded based on the amount generated during the period and are not offset against financial income.

10. Principles for recognizing current corporate income tax expense and other taxes.

Current corporate income tax expense, deferred corporate income tax expense.

- Current corporate income tax expense is determined based on taxable income and the corporate income tax rate for the current year.
- The determination of corporate income tax expense is based on current tax regulations. However, these regulations change from time to time, and the final determination of corporate income tax depends on the results of an audit by the competent tax authority.
- Deferred corporate income tax expense is determined based on deductible temporary differences, taxable temporary differences, and the corporate income tax rate.

Value Added Tax

Value Added Tax (VAT) is declared and accounted for using the deduction method. Other taxes are declared and paid by the Company in accordance with current State regulations.
